Yield

The application of **bio-algeen S92** resulted in yield increases of up to 57,7 dt/ha

Further trials also demonstrate a statistically significant effect of **bio-algeen S92** on yield.

Starch

In variant 3 (Standard variant), an increase in starch content of up to 7,63% was observed.

Variant	Product	Application rate	Date	Development stage - BBCH-Code			
		l/ha		10	20	30	40
	Kontrolle						
2		4,0	T1	2,0			
			T2		2,0		
3 Standard application		5,0	T1	2,0			
			T2		1,0		
			T3			1,0	
			T4				1,0
4		4,0	T1	1,0			
			T2		1,0		
			T3			1,0
